Congress of the United States

Subcommittee on Health and the Environment
of the
Committee on Interstate and Foreign Commerce
Washington, D.C. 20515

July 30, 1979

Honorable Harley O. Staggers
Chairman
Committee on Interstate
and Foreign Commerce
U. S. House of Representatives
Washington, D. C. 20515

Dear Mr. Chairman:

The attached information was submitted by the American Hospital Association (AHA) in response to the request of April 19 of the Subcommittee on Health and the Environment. The AHA has now supplied data on individual hospitals' revenues and expenses arranged by state and by census division, but without identification of the hospital by name.

This submission must be viewed as a complement to the previous Subcommittee print entitled "Hospital Expense Data: 1976-1977 -- A Partial Response by the American Hospital Association to the Request of the Subcommittee on Health and the Environment" of May, 1979. This data supplied by the AHA represents a good faith effort both to assist the Committee in its examination of revenue figures and to abide by a commitment, however, of confidentiality they have made to hospitals. Readers of the materials should note that it does not contain figures for gross revenues but only for patient revenues; as such, it does not reflect total hospital income since it omits monies designated "other revenue" by the AHA. Moreover, the columns expressing total expenses as a percentage of new revenues do not include either this "other revenue" or gross revenues but instead incorporate amounts from which unspecified deductions for "contractual adjustments, bad debts, charity, and so forth" have been made. Since the AHA Panel Survey for the past four years has reported "other revenue" in excess of two billion dollars in each of its annual summaries, these omissions and deductions may indeed have a significant effect on percentage calculations. But despite the limitations of the data provided by the AHA, the Subcommittee has accepted these surrogate figures at this time to allow the organization to abide by its commitment to use revenue collection surveys "for statistical purposes only."

As an additional part of our agreement with the AHA, we have been informed that it will survey members during this calendar year to ascertain their response to a policy of dis-

closure of individual hospital revenue information gathered in the annual survey. It is to be emphasized that in negotiations for both the requested information and the survey, the Subcommittee in no way compromised any rights of Congress to request further information--including reports identifying specific hospitals by name--nor did it agree to any restrictions on future requests or uses of such material.

I trust that this data will be of use not only to the Subcommittee, but also to the full Committee and to the Congress in its consideration of pending hospital cost containment bills and related legislation. This array of financial information can provide an understanding of discrete as well as over-arching patterns of hospital costs and can enable Members to examine the relationship of revenues and expenses. This relationship assumes particular importance under the Administration's proposal--which has a voluntary limit applicable to expenses and a mandatory program which, if triggered, controls revenues. An overview of the differences between revenues and expenses in this data and in that of the AHA Panel Survey also raises several important and currently unanswered questions:

-- Why have total revenues consistently exceeded total expenses in recent years?

-- How is revenue "other" than patient revenue distributed among individual hospitals?

-- Why was there a total revenue surplus of $2.2 billion in 1979 ($62.0 billion in revenues; $59.8 billion in expenses)?

-- What is the extent and size of "bad debts"?

-- How is the "bad debt" distributed among hospitals by categories of size, type of ownership, and urban location?

I hope that with these questions, current documents, and our follow-up activities in mind; the Congress may provide appropriate oversight for the billions of federal dollars provided to hospitals for the care of Medicare and Medicaid recipients and may begin to evaluate and understand some of the possible effects of legislation--or failure to legislate--on individual hospitals as well as on the industry and the nation as a whole.

Sincerely,

HENRY A. WAXMAN
Chairman

VARIANCE REPORT

The data in this report provide:

- the 1977 occupancy rate for U. S. hospitals grouped by control and bedsize
- their variance from the mean percentage difference of Gross Patient Revenues for 1976 and 1977

The amount of variance was determined by calculating the standard deviation (σ) for each bedsize and control group from the mean ($\bar{X}$).

These values (X) were placed in ranges on the following basis:

$$
\begin{aligned}
-3 &= X \leq -2\sigma \\
-2 &= -2\sigma < X \leq -1\sigma \\
-1 &= -1\sigma < X \leq \bar{X} \\
1 &= \bar{X} < X \leq 1\sigma \\
2 &= 1\sigma < X \leq 2 \\
3 &= 2\sigma < X
\end{aligned}
$$

Thus, the first row of each bedsize category provides the average occupancy rate for the category, the number of hospitals within a particular range, and the mean percent difference of Gross Patient Revenue from 1976 to 1977. The second line of the category provides the total dollar figure of difference between the 1976 and 1977 gross patient revenues for the category.
